I have been a XM Satellite Radio Member since October, 2003 & I love it! I also love the new feature of Instant Traffic & Weather. I live in Kingwood, Texas & work in The Woodlands which is 35 miles from my home near Houston. I especially like the fact that I can tune into the Houston Metropolitan Area channel for traffic & weather without having to wait for the half-hour or hourly news like on local radio stations. I can get an instant report & know exactly which way I need to travel to or from work. They cover all the major freeways & report accidents immediately & in Houston, there are a lot of them & usually the entire freeway is shut down as a result.

I know that having the Instant Traffic & Weather, I have saved a lot of time & gas from not having to sit in traffic waiting for an accident to be cleared.

I also like the weather report for the same reason, I can access it instantly without having to wait for the half-hour or hourly news, weather & traffic on local stations.

Please do not eliminate this wonderful source of information. After all, I'm paying for monthly satellite service & this is part of that service!
